

**UDcast Exhibits at NAB 2002  
(National Association of Broadcasters - The Convergence Marketplace)  
6th – 11th of April, Las Vegas, USA**

*Breaking news at the event will be the presentation of UDcast's new version of UDrouteCast, the expert multicast routing software.  
**Sophia-Antipolis, 27th March 2002***

---

Participating at NAB 2002 will additionally provide UDcast the opportunity to officially announce its recent expansion into North America – an office in Washington has recently opened.

The [NAB 2002](#), dubbed as the «The Convergence Marketplace » takes place between the 6th and 11th of April 2002 in Las Vegas; the conference sessions begin on the 6<sup>th</sup>, and the exhibition opens on the 8th.

The NAB (<http://www.nab.org>) is considered by professionals to be the World's largest event in the sector of image and sound technologies. The event attracts 113,000 visitors to the exhibition hall of 1,600 stands.

Organised by the National Association of Broadcasters since 1922, the event brings together each year managers and executives from the audiovisual sector, to discover the latest digital communications equipment and technology: broadcasting, radio, TV, production, film/video, post-production, audio production, multimedia, and Internet and satellite telecommunications.

**UDcast will be presenting at NAB 2002 the technical strengths of its UDrouteCast version 02:**

- UDrouteCast **optimises the dynamic routing of multicast traffic, minimising the use of the uplink return path.**
- **It enables true scalability** in the context of managing up to thousands of active routers.
- UDrouteCast is **compatible with existing standard multicast protocols**, in particular PIM-DM and IGMP.
- **It includes advanced network address translation (NAT) functionality**, in enabling bi-directional connectivity to the Mbone.

***UDcast will be present at stand S 9656 of the Sands Expo Center***

*David Finkelstein (Washington office), Philippe Jacut (Paris office)  
and John Oliver (Sophia Antipolis Office) will be there to welcome you.*

**Presentation of version 02 of UDrouteCast ; White Paper on UDLR (Uni-directional Link Routing); recent press releases; press pack.**

**About UDcast**

UDcast offers Internet access and application providers, content broadcasters and manufacturers of network and multimedia equipment with ready-to-use applications, enabling the complete and transparent integration of digital satellite (DVB-S), digital terrestrial (DVB-T) and digital radio (DAB) links to the Internet. UDcast was founded in June 2000 by Didier Tymen, Chairman and Chief Executive of the company, and four research engineers from INRIA (the French National Institute for Computer and Control Science), specializing in the broadcasting of data at high bandwidths. The company now employs 22 people and is based in Sophia-Antipolis, Paris and Washington.

For more information, visit the company's Web site at <http://www.udcast.com>.
