UDcast Discusses DVB-H Testing at Informa's DVB-H Conference

Presentation offers sneak peek at upcoming second generation UDcast DVB-H Analyzer

SOPHIA-ANTIPOLIS, France – June 1, 2006 – UDcast, the leading provider of mobile TV IP network components, announced today that VP Marketing Mr. Filip Gluszak is a featured speaker at the Informa Telecoms & Media conference on Assessing the Market Impact of DVB-H. Taking place June 13-15 at the Waldorf Hilton in London, the conference will focus on successful strategies for the launch and roll-out of mobile broadcast as well as the challenges operators face in monetising DVB-H.

UDcast's Gluszak will open the session entitled Examining the Results of Mobile TV Trials, with a presentation on Testing DVB-H in the Field. Topics of discussion will include the industry's experience with DVB-H, mobile testing with portable devices in SFN and MFN environments, network monitoring and reference receivers. His presentation is scheduled for 12:15 p.m. on the second day of the conference, June 14.

Gluszak will also preview the upcoming second generation launch of the DVB-H Analyzer, GOLDENEAGLE, a test reception and monitoring tool used for analyzing and confirming compliance with DVB-H standards. The UDcast DVB-H Analyzer GOLDENEAGLE performs a number of tests important to validate the conformity and quality of a DVB-H transmission chain required by all major broadcasters, cellular operators and regulator authorities. Its features include:

- On and off-site measurements on RF layer, MPEG2 layer, IP protocol layers and detailed DVB-H data analysis
- Centralized broadcast management software
- Alarms management based on multiple parameter thresholds
- Real time and cumulated measurement (configurable averaging period)
- Audio / video streaming and sequence recording for visual quality analysis and collection of proof samples (manual, on event or scheduled)
- Automatic scanning and system set-up (identification of multiplex and channels broadcasted)

Informa Telecoms & Media's Assessing the Market Impact of DVB-H conference is billed as the only event dedicated specifically to DVB-H, the standard for mobile TV. The conference will focus on the challenges of DVB-H roll out and review the technology options available to ensure a superior user experience on mobile TV devices. Attendees will gain an insight into the key technology challenges posed by DVB-H network roll out and discover broadcasting solutions, plus the latest results from DVB-H trials.

About UDcast

UDcast is a leading provider of IP over broadcast media, focusing on IPTV to the mobile DVB-H solutions as well as satellite-aware enterprise networking solutions. UDcast provides DVB-H standard compliant solutions for the delivery of IPTV to mobile devices. In addition, UDcast provides satellite aware IP appliances that bring terrestrial-like performances and security to broadband satellite links. UDcast's feature rich solutions enable satellite service providers to deliver revenue-generating value added services that meet enterprise needs. Founded in 2000, UDcast maintains its global headquarters in Sophia Antipolis, France. For more information, visit www.udcast.com.
